**Notice of Fifth Addendum to the  
LOCALIZED HEALTH IMPACTS REPORT  
for  
Selected Projects Awarded Funding Through the  
Alternative and Renewable Fuel and Vehicle Technology  
Program Under Solicitation PON-13-609  
Publication CEC-600-2014-004-AD5**

The Energy Commission is required under California Code of Regulations, Title 13, Chapter 8.1, Section 2343(c)(6), to consider the localized health impacts and environmental justice when approving projects for funding.

*The Localized Health Impacts Report for Selected Pilot-Scale and Commercial-Scale Advanced Biofuels Production Facilities Projects awarded funding through the Alternative and Renewable Fuel and Vehicle Technology Program under Solicitation PON-13-609* was posted May 9, 2014, and the 30-day public comment period ended June 9, 2014. Four addendums to this report were posted between August 11, 2014, and December 1, 2015.

The Energy Commission has published a fifth addendum to the original Localized Health Impacts Report that analyzes a new location and community impacts of a project proposed for funding under the Program. The City of Petaluma has proposed augmenting the project location. The anaerobic digester and biogas processing unit will remain at the originally proposed location of 3890 Cypress Drive, Petaluma; however, the fueling station will now be located at 1309 Dynamic Street, Petaluma, a distance of less than five miles. The addendum was publicly available on March 12, 2018.
